

MIDI ROLLER & WET OUT STATION

Compact unit allows you to work anywhere!

Whether you choose the hybrid battery version or the plug in unit, the Midi Roller makes quick work of wetting out DN50-225 (2-9") CIPP liners.

Can be mounted on a separate work surface or combined with the Wet Out Station which doesn't require an additional power source - it's powered by the Midi Roller!

Comes with a DN100 (4") Liner Holder that attaches to the Midi Roller to free up a pair of hands while pouring resin (*other sizes available*).

USES AND BENEFITS

Midi Roller

- 2 Versions:
 - **Wall Powered:** Powered by standard wall outlet.
 - **Battery/Hybrid:** Built-in battery with \approx 10 hours* working time to allow you to work anywhere without access to electricity (or plug in & charge while in use)
- Lightweight, compact, & easy to transport (18kg/40lbs).
- Variable speed and bi-directional controls.
- Upper roller lifts up making wet out faster and easier.
- Silicone belt and rubberized upper wheel.
- Includes DN100 (4") Liner Holder which serves as an extra set of hands when pouring resin into the liner (*additional sizes available*).

Wet Out Station

- An innovative and practical addition to the Midi Roller.
- No power source needed - powered by Midi Roller belt.
- Built-in wheels and transport handle.
- Quickly & easily set up on job sites.
- Lightweight, compact, & easy to transport (36kg/79.4lbs)
- Simply add the Midi Roller to create a full powered Wet Out Station with a combined belt length of 1.5m (59").

Midi Roller Technical Specifications	
Category	Measurement
